

Our Philosophy

Listen

Understand

Implement

EncompassIT believes in fully understanding your business needs before presenting a solution.

Once you have defined what your business needs, we will present you with multiple potential solutions, allowing you to choose the option that will best suit your need.

Utilizing our broad range of services and detailed knowledge of technology, we can help you implement the most cost-effective solutions for your business— now *and* as it grows. This type of service can only come from a comprehensive understanding of your needs and the technology available to meet them.

Now and in the future, EncompassIT is here for your business.

How to find the answers to your technology questions:

EncompassIT

Is your network safe?

Do you have a strong internet presence?

**Healthcare Providers—
Are you HIPAA compliant?**

EncompassIT Offers What YOUR Business Needs...Solutions!

We offer a wide range of custom-tailored solutions to help your business flourish without worrying about the technology.

Web Hosting & Internet Presence— A wide array of hosting packages with either Windows or Linux-based hosting or our complete Internet Presence Package.

Data Security Auditing & Planning— The only way to ensure your network's security is to plan a solution, then audit it to test its effectiveness. We can audit your current system, or help plan one.

Managed Firewall Solutions— From intrusion detection to spam filtering, our Managed Firewall Solution means FULL protection.

Disaster Planning & Recovery— You cannot avoid life's uncertainty's, fire, tornado, hardware theft, but you *can* be prepared! We can help you with it all, from off-site storage to complete disaster recovery plans.

Desktop & Server Solutions— System upgrades, routine maintenance, and licensing issues can all be a headache, but they don't have to be.

Local & Wide Area Networking— As your business expands, so does your network. We can help you expand to multiple locations, design a network from scratch, or fine tune your existing network.

Your Prescription for HIPAA Compliance: EncompassIT!

Passed in 1996, HIPAA has been designed to protect confidential healthcare information through improved security standards and privacy legislation. There are 18 information security standards in three areas that must be met to ensure compliance with the HIPAA Security Rule.

Do you have to comply with HIPAA Federal Regulations?

If you are a health care provider, a healthcare clearinghouse, or a health plan of any sort, you will need to comply to the Federal Regulations as stated in HIPAA legislation.

Where does your practice stand?

EncompassIT can help you get there without all the hassle.

We understand that your healthcare practice is unique and you require personal attention as well as a solution that fits your business.

Contact us today to learn more about how EncompassIT provides healthcare solutions that work.

About Us:

When you select EncompassIT for your technology needs you are choosing a long-term business partner.

The founders of EncompassIT have over 18 years experience in the information technology field. They saw the need for knowledgeable, reliable expertise in IT for those businesses without their own in-house departments, and EncompassIT was born.

Technology changes every day— we can keep you up-to-date, giving you the time and freedom to do what you do best—grow your business while we protect your investment.

Whatever your industry, you will receive time-tested results specifically to *your* needs. Whether you need an outsourced security solution, project planning and implementation, web hosting, or more, EncompassIT has IT covered.
